REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Regarding claims 8 and 22 the reasons for allowance remain as stated in the prior Office action dated 3/30/04. Regarding claim 1, the Examiner agrees with Applicants' arguments regarding the prior art references applied in the prior Office action. However, it should be noted that other art of record, at first glance, appear to disclose the features of claim 1 as now recited. For example, Fig. 7 of Kadota et al. U.S. 6,297,713 appears to disclose the distance between the inner side of outermost electrode finger 4a and the substrate edge 2b being greater than a distance between the outermost electrode finger 4a and an adjacent "electrode finger" 3a₁. However, the electrode 3a₁ is actually half of a split "electrode finger" 3a (see U.S. '713 at, e.g., col. 5, lines 28-33). Therefore, the distance between the outermost electrode finger 4a and an adjacent electrode finger 3a must be measured from the inner edge of outermost electrode finger 4a to the midpoint of the gap between the two split halves 3a₁ and 3a₂ of electrode finger 3a, thereby not meeting the claimed feature. Regarding claim 15 and newly added Fig. 13 clearly showing such an embodiment, the prior art of record does not disclose or suggest such an edge reflection surface acoustic wave filter having each of the recited features. Regarding new claim 29 which appears to be drawn to the embodiment of Fig. 6, the prior art of record does not disclose or suggest such an edge reflection surface acoustic wave filter having each of the recited features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
